

RIFQI HAIKAL CHAIRIANSYAH

Jakarta, Indonesia | 085362784585 | r.haikal1610@gmail.com | [Linkedin](#) | [Github](#) | [Portofolio](#)

Software Engineer with 3 years of hands-on software development experience, Strong in C#, ASP.NET MVC/.NET Core, with additional full-stack experience across React, Angular and Spring Boot. Experienced in building and optimizing backend services, REST APIs, data-intensive dashboards, modular architectures, and secure applications using SQL optimization, Entity Framework, RBAC, SSO, and MFA. Proven experience delivering production systems for across many industry like telecommunications, oil & gas, research and development, and financial services.

Work Experiences

PT TOWER BERSAMA INFRASTRUCTURE TBK – TELECOMMUNICATION INFRASTRUCTURE SERVICE

South Jakarta, Indonesia

IT SOFTWARE DEVELOPER (CONTRACT BASED)

Jul 2026 – Present

- Re-architected a monolithic enterprise application into 8 standalone applications, isolating codebases and deployments so changes or failures in one functional module no longer impacted the others.
- Developed 3 enterprise monitoring dashboards for Payout, Business Projects, and HSE using C#, ASP.NET MVC, and Telerik, providing management with centralized operational visibility.
- Optimized SQL Server data processing using Stored Procedures, set-based queries, indexing, and transactional logic across 8 applications and 3 dashboards.
- Collaborated with PMs and business users across requirements analysis, system design, development, testing, deployment, and maintenance to deliver production-ready solutions.

Tech Stack: C#, ASP.NET MVC, .NET Core, Telerik, Microsoft SQL Server (SSMS), Stored Procedure.

PT.PERTAMINA HULU ROKAN (PHR) – OIL and GAS INDUSTRY

South Jakarta, Indonesia

IT BUSINESS SOLUTION INTERN

Dec 2025 – Jun 2026

- Developed ISEA (Subsurface Integrated Exploration Application), an N-Tier enterprise platform consolidating seismic, drilling, and exploration workflows into a unified application.
- Optimized backend data processing for millions of database records using Entity Framework, Deferred Execution, AutoMapper DTOs, and Kendo UI to improve resource efficiency.
- Implemented enterprise security controls including Keycloak SSO, MFA, Serilog audit logging, and load-balancer IP tracking for authentication, authorization, and compliance requirements.
- Designed a reusable Dynamic Milestone Engine using Generic Repository and Service patterns, reducing duplicated implementation across modules and supporting faster feature development.
- Deployed the application to IIS in accordance with ADS v1.6 requirements.

Tech Stack: ASP.Net MVC, C#, SQL Server, Entity Framework, Kendo UI, Keycloak, Serilog, IIS.

BADAN RISET DAN INOVASI NASIONAL (BRIN) – RESEARCH and DEVELOPMENT

Central Jakarta, Indonesia

SOFTWARE ENGINEER (PROJECT-BASED PARTNER)

Oct 2025 – Dec 2025

- Joined as a technical partner to complete a Research and Innovation Funding Monitoring System within a 1-month delivery deadline.
- Optimized financial modules for tracking research fund inflows and outflows, improving data accuracy and accountability.
- Bridged business stakeholders and developers through requirements clarification, code reviews, and production deployment.

Tech Stack: React.js, PHP (Laravel), SQL, Postman, RESTful API.

PT.JAVAN CIPTA SOLUSI – IT CONSULTANT

Yogyakarta, Indonesia

ANGULAR DEVELOPER INTERN | MSIB (Internship and Certified Independent Study)

Jan 2025 - Jun 2025

- Delivered 6 enterprise applications for 5 clients including BRI, KPK, Kemenkeu, Kominfo, and UII within Agile sprint timelines.
- Developed responsive enterprise UIs from Figma designs using Angular, React.js, and Vue.js.
- Developed Spring Boot backend services for Kominfo User Access Management and UII SIMLAB, supporting access control and inventory management workflows.
- Collaborated within Agile teams across development, testing, issue resolution, and delivery.

Tech Stack: Spring Boot, React.js, Angular, Vue.js.

PT.FEDERAL INTERNATIONAL FINANCE – MULTIFINANCE

South Jakarta, Indonesia

FULLSTACK DEVELOPER INTERN | Individual Internship

Jun 2024 - Jan 2025

- Developed an HRIS proof-of-concept with Role-Based Access Control (RBAC) for managing 100+ employee profiles.
- Built API Central, a Swagger-documented portal standardizing 100+ APIs and improving developer onboarding and API integration workflows.
- Developed reusable Angular/TypeScript components and Spring Boot services for standardized data exchange with legacy systems.

Tech Stack: Angular, Spring Boot, Swagger.

IT CONSULTANT — FREELANCE

SOFTWARE ENGINEER / IT CONSULTANT

Remote/Work from Home

Aug 2023 - Present

[View Project](#)

- Delivered 20+ web projects for academic organizations and MSMEs, covering requirements consultation, UI/UX design, development, testing, deployment, and handover.
- Translated business requirements into production-ready web applications within agreed delivery timelines.
- Worked directly with clients to clarify requirements, prioritize features, and deliver maintainable solutions.

Tech Stack: Figma, React.js, Next.js, Vue.js, TypeScript, JavaScript.

Project Showcase

CRYPTO ANALYST BOT – AI AGENTIC WEB

Jun 2026

AI-powered web assistant that gives crypto beginners real-time market analysis and investment insights.

[View Web](#)

- Delivered a full-stack AI web app on Next.js and TypeScript, deployed on Vercel, that turns raw market data into beginner-friendly insights.
- Built custom Next.js API routes that combine live market data (Dexscreener, news aggregators) with Generative AI models (Groq) for real-time trend analysis.
- Automated continuous market monitoring with background workers and a Telegram bot that broadcasts real-time update notifications.
- Secured user accounts with Supabase Auth and stored per-user scalping targets and preferences for personalized monitoring.

Tech Stack: Next.js, TypeScript, Supabase, Generative AI (Groq), Telegram API.

HIRING PLATFORM FOR JOBSEEKER

Oct 2025

Two-sided hiring platform: admins manage job listings while candidates browse and apply.

[View Web](#)

- Implemented authentication and RBAC for 2 roles (admin, candidate) using Supabase Auth.
- Built a reusable, responsive component library (Buttons, Inputs, Cards, Badges) with Tailwind CSS and Headless UI for consistent UX across desktop and mobile.
- Managed application state with Zustand and React Context API for predictable data flow.
- Integrated React Hook Form for robust form handling and validation in the candidate application flow.

Tech Stack: Next.js 16, TypeScript, Tailwind CSS, Headless UI, Supabase.

DEL-PICK: MOBILE DELIVERY and LOGISTICS APP

Aug 2024 – Jul 2025

Mobile delivery and logistics app built to solve transportation and delivery problems.

[View Project](#)

- Led a 3-person team through the full product lifecycle, from concept to a working mobile delivery application.
- Translated high-fidelity Figma UI/UX designs into 20+ polished screens in Flutter.
- Built and integrated 30+ RESTful APIs with Express.js powering real-time order processing, driver matching and route optimization.

Tech Stack: Flutter, Dart, Express.js, JavaScript, C++.

Education

INSTITUT TEKNOLOGI DEL

Aug 2021 - Aug 2025

Bachelor Degree in Informatics, GPA 3.39/4.00

Relevant CourseWork : Web-based Application Development, Software Testing and Quality Assurance, Software Analysis and Design, and Mobile Application Development.

Skills

HARD SKILLS

- **Core Strength (Enterprise Web and Data):** C#, ASP.NET MVC, .NET Core, Entity Framework, SQL Server (SSMS), Stored Procedure, Telerik / Kendo UI. Applied to internal enterprise portals and monitoring dashboards in Telecommunication and Oil and Gas.
- **Frontend Development:** [TypeScript](#), [JavaScript](#), [HTML](#), [CSS](#), Tailwind, React.js, Angular, Vue.js, Next.js.
- **Backend Development:** [Java](#) (Spring Boot), [PHP \(Laravel\)](#), Node.js (Express.js), RESTful API.
- **Security and Architecture:** Keycloak SSO, MFA, RBAC, N-Tier, Modular / Standalone Architecture, Serilog Audit Trail, IIS Deployment.
- **Tools and Testing:** Postman, Katalon, Git, Swagger, Figma.
- **Methodology:** SDLC (requirement analysis to maintenance), Agile Sprint, PM and end-user collaboration.

SOFT SKILLS

Requirement Analysis, Stakeholder Communication, Problem Solving, Cross-functional Collaboration, Ownership, Adaptability.

LANGUAGES

Bahasa Indonesia : Native.

English : [Upper Intermediate](#).
